DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to a method of modulating growth of a tumor by inhibiting Oct-1 mRNA function, classifiable in class 514, subclass 44.
- II. Claims 4 and 5, drawn to a method of determining the efficacy of an anti-cancer therapeutic agent, classifiable in class 436, subclass 6.
- III. Claims 6-8, drawn to a method of determining the role of a protein of interest as an oncoprotein, classifiable in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. The function of invention I is to modulate growth of a tumor, the function of invention II is to determine the efficacy of an anti-cancer therapeutic agent and the function of invention III is to determine the role of a protein as an oncoprotein.

Furthermore, examining any of inventions I-III together would impose a serious search burden. In the instant case, prior art searches of methods of modulating tumor growth are not coextensive with prior art searches of methods of determining efficacy of an anti-cancer agent or methods of determining the role of a protein as an oncoprotein.

Art Unit: 1635

Search of each of these inventions would require different key word searches of each compound used and of each distinctive step of each method using divergent patent and non-patent literature databases. The different searches would then require subsequent in-depth analysis of the unrelated prior art literature, placing a serious burden on the Office in terms of both search and examination. As such, it would be burdensome to perform examination of any of inventions I-III together.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
